

# Botanical Garden Linz

## June 23 – October 28, 2018

**Dr. Friedrich Schwarz, Executive director:**

As a summer focus exhibition there was a real speciality in our garden: A time travel through the evolution of life and the earth.

We live in a fast-paced, hectic time in which many people feel under pressure. That makes places where energy can be recharged all the more valuable.

The people of Linz have the Botanical Garden on the Gugl in the middle of the city, which covers more than 4 hectares, and the numerous visitors (almost 78,000 in 2017) appreciate the facility as an oasis of tranquility.

The last days of the exhibition were also very positive.

Many people still came especially to see the exhibition. The feedback was completely positive. It was very worthwhile to have had this exhibition in the garden and it was a real enrichment.

I am very grateful for it!
